

PATENT
10/082,745

- 1 1. (currently amended) A computer controlled user-
2 interactive document editing display system comprising:
3 means for defining ~~one~~ a first alphanumeric segment of
4 displayed data in a displayed text document having
5 continuous lines of text;
6 means for defining ~~another~~ a second alphanumeric
7 segment of displayed data in said displayed text document;
8 means enabling a user to select to swap said ~~one~~ first
9 segment with said ~~another~~ second segment; and
10 means responsive to said user selection to swap for
11 swapping the positions of said segments of data with each
12 other.
- 1 2. (currently amended) The document editing display system
2 of claim 1, further including means for highlighting said
3 ~~one~~ first and said ~~another~~ second segments prior to swapping
4 the positions of said segments.
3. (cancelled).
- 1 4. (currently amended) The document editing display system
2 of claim 3 1, wherein said alphanumeric text in each of said
3 swapped segments is a phrase.
- 1 5. (currently amended) The document editing display system
2 of claim 3 1, wherein said alphanumeric text in each of said
3 swapped segments is a sentence.
- 1 6. (currently amended) The document editing display system
2 of claim 3 1, wherein said alphanumeric text in each of said
3 swapped segments is a paragraph.

2

PATENT
10/082,745

- 1 7. (currently amended) The document editing display system
2 of claim 3 1, wherein said alphanumeric text in each of said
3 swapped segments is at least one page in length.
- 1 8. (original) The document editing display system of claim
2 7, wherein said swapped segments further include images.

PATENT
10/082,745

1 9. (currently amended) A method of user-interactive document
2 editing on a display comprising:
3 defining ~~one~~ a first alphanumeric segment of displayed
4 data in a displayed text document having continuous lines of
5 text;
6 defining ~~another~~ a second alphanumeric segment of
7 displayed data in said displayed text document;
8 enabling a user to select to swap said ~~one~~ first
9 segment with said ~~another~~ second segment; and
10 swapping the positions of said segments of data with
11 each other responsive to a user selection to swap.

1 10. (currently amended) The document editing method of claim
2 9 further including the steps of highlighting said ~~one~~ first
3 and said ~~another~~ second segments prior to swapping the
4 positions of said segments.

11. (cancelled)

1 12. (currently amended) The document editing method of claim
2 ~~11~~ 9, wherein said alphanumeric text in each of said swapped
3 segments is a phrase.

1 13. (currently amended) The document editing method of claim
2 ~~11~~ 9, wherein said alphanumeric text in each of said swapped
3 segments is a sentence.

1 14. (currently amended) The document editing method of
2 claim ~~11~~ 9, wherein said alphanumeric text in each of said
3 swapped segments is a paragraph.

4

PATENT
10/082,745

1 15. (currently amended) The document editing method of claim
2 ~~11~~ 9, wherein said alphanumeric text in each of said swapped
3 segments is at least one page in length.

1 16. (original) The document editing method of claim 15,
2 wherein said swapped segments further include images.

1 17. (currently amended) A computer program having program
2 code included on a computer readable medium for user-
3 interactive document editing on a computer controlled
4 display system comprising:
5 means for defining ~~one~~ a first alphanumeric segment of
6 displayed data in a displayed text document having
7 continuous lines of text;
8 means for defining ~~another~~ a second alphanumeric
9 segment of displayed data in said displayed text document;
10 means enabling a user to select to swap said ~~one~~ first
11 segment with said ~~another~~ second segment; and
12 means responsive to said user selection to swap for
13 swapping the positions of said segments of data with each
14 other.

1 18. (currently amended) The computer program of claim 17,
2 further including means for highlighting said ~~one~~ first and
3 said ~~another~~ second segments prior to swapping the positions
4 of said segments.

19. (cancelled).

1 20. (currently amended) The computer program of claim ~~19~~ 17,
2 wherein said alphanumeric text in each of said swapped
3 segments is a phrase.
